ORTHOBIOLIGICS

BORN TO
NURTURE.

MEDLINE**UNITE**[®] Amnion Solutions
Intelligently designed to enhance healing at the surgical site

Powered by nature.

Amnion is designed by nature to nurture cellular life. Its powerful properties, which help foster the growth of the fetus in utero, also make it an ideal material to cover wounds^{1-3, 6} and support healthy tissue regeneration.⁴⁻⁶ We've cultivated these properties in a variety of surgery-ready formats to help enhance wound healing and positive patient outcomes.

Promote healing with Amnion.

- » Derived from human amniotic tissue, amnion acts as a safe, natural covering for wounds¹⁻⁶ helps decrease inflammation,³ and reduces fibroses, scarring and adhesion at the surgical site.⁴
- » Studies show that amniotic fluid contains important growth factors,^{1, 2, 5} extracellular matrix^{2, 5} molecules, hyaluronic acid,^{1, 4, 5} fibronectin,² laminin,⁴ prostaglandins,³ and cells.⁶
- » Available in multiple surgery-ready formats to suit surgeon preference and patient need.
- » Supplements the use of hardware to create a complete surgical solution.

Liquid or patch? You choose.

Ambient Temperature Liquid Amnion

- » Ready to use with no thawing or preparation required.
- » Store at ambient temperature (59-86°F/15-30°C).

Cryopreserved Liquid Amnion

- » Flowable for easy application and precise delivery to intended site.
- » Store at -70°C or colder. Thaw only prior to use at room temperature.

Ambient Dual-Layer Amnion Patch

- » Hydrates rapidly and readily adheres to wound surface or surgical site.
- » Applies dry with either side up or down.
- » Store at ambient temperature (59-86°F/15-30°C).

Tissue you can trust.

Meticulously screened and processed according to the highest safety standards.

- » Birth tissues are recovered during planned cesarean sections and processed aseptically to preserve its inherent properties.
- » Placental donors go through a rigorous prescreening qualification and are tested according to FDA guidelines for infectious disease.
- » Tissue is processed in accordance with the standards and guidelines established by the American Association of Tissue Banks (AATB).

Item No.	Description	Size
MALQ1005D	Ambient Liquid	0.5 mL
MALQ1010D		1.0 mL
MALQ1020D		2.0 mL
MALQ2005D	Cryopreserved Liquid	0.5 mL
MALQ2010D		1.0 mL
MALQ2020D		2.0 mL
MA832	Dual-Layer Patch	2 x 3 cm
MA833		4 x 4 cm
MA834		4 x 6 cm
MA835		4 x 8 cm

Additional sizes available.
