

INTELLIGENTLY DESIGNED

# AHEAD OF THE CURVE.

**Articulating Pin Distractor** provides unobstructed access to joints with the ability to converge or diverge the joint space

**Small Joint Arthrotome** short, curved design allows for enhanced joint access and dual cutting features allow for easier cartilage removal

Unique deconstructed U-style Lisfranc plates address variations in injury patterns and patient anatomy.

Multiple construct options for isolated TMT joints offer surgeons greater intraoperative flexibility.
