

INTELLIGENTLY DESIGNED

# CHOICE COMPRESSION

**Articulating pin distractor** provides unobstructed access to joints with the ability to converge or diverge the joint space

**Small joint arthrotome** short, curved design allows for enhanced joint access and dual cutting features allow for easier cartilage removal

**Dual-mode compression** allows for interfragmentary or traditional dynamic compression through the same feature

**Lapidus plate:** Target medial or intermediate cuneiform with solid cross-joint lag screw

**UNITE**<sup>®</sup>  
FOOT & ANKLE
